

# 210

## Application Modules

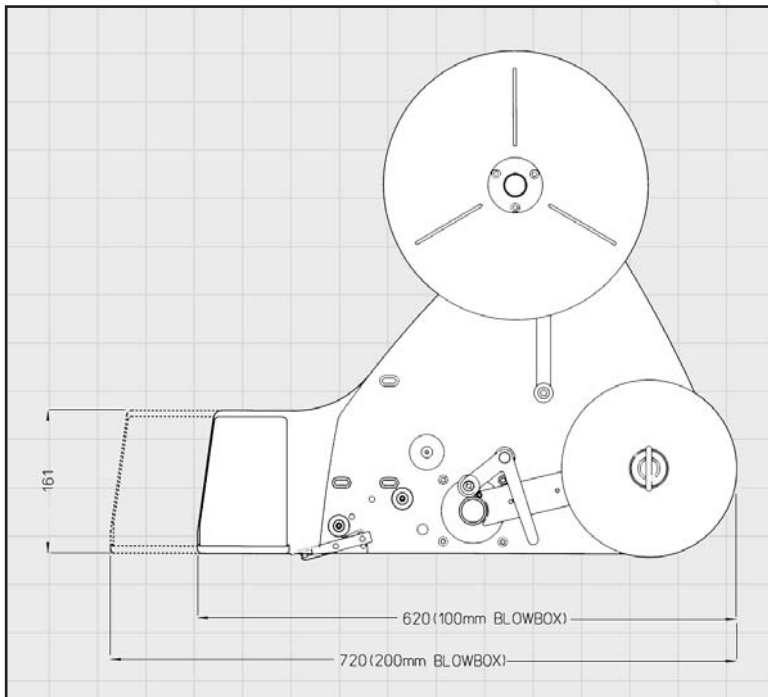

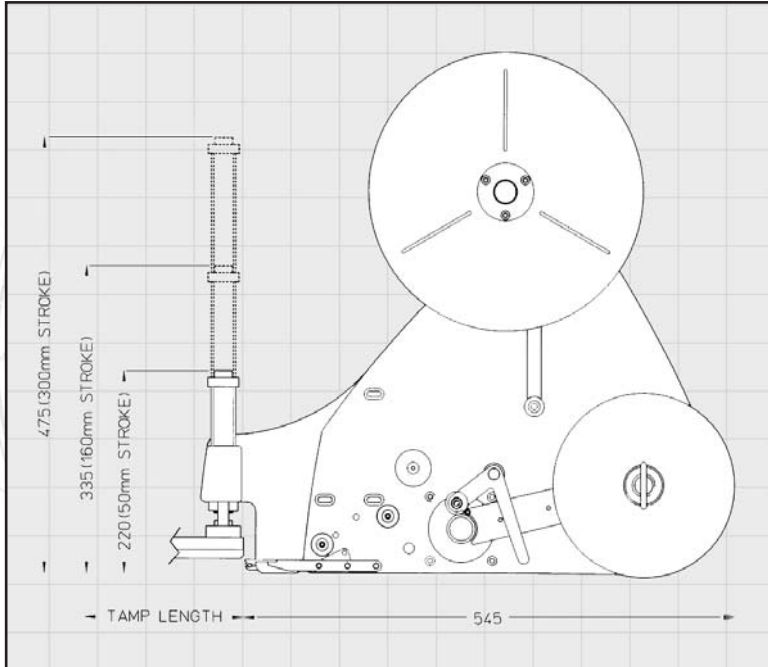

The 210 tamp and airjet application modules complement the basic 210 touch applicator, transforming it into a flexible modular system for label delivery and application.

- ▲ Airjet, non-contact apply
- ▲ High speed
- ▲ Two sizes of airjet grid
- ▲ Tamp apply
- ▲ Various strokes up to 300mm
- ▲ Low maintenance
- ▲ Easy operation

# 210

## 210 Application Modules Technical Specification

### Airjet Apply Module:

#### 100mm Version:

- Min. Label Size: 20mm (W) x 20mm (L)
- Max. Label Size: 104mm (W) x 104mm (L)

#### 200mm Version:

- Min. Label Size: 20mm (W) x 20mm (L)
- Max. Label Size: 104mm (W) x 204mm (L)

#### Direction:

- Left or right-handed

#### Accuracy:

- $\pm 1$ mm at 19mm blow distance

#### Operator Controls:

- LCD display for selection of airjet dwell time, air assist delay

#### Compressed Air Supply:

- Clean, dry air at 5 bar (7 bar maximum) at up to 104l/min.  
8mm quick-release inlet adaptor

#### Dimensions:

- See drawing

### Tamp Apply Module

- Min. Label Size: 25mm (W) x 25mm (L)
- Max. Label Size: 104mm (W) x 204mm (L)

#### Cylinder Length:

- 50mm, 160mm or 300mm stroke

#### Direction:

- Left or right-handed

#### Accuracy:

- $\pm 1$ mm

#### Operator Controls:

- LCD display for selection of tamp dwell time, air assist delay

#### Compressed Air Supply:

- Clean, dry air at 5 bar (7 bar max) at up to 90l/min.  
8mm quick-release inlet adaptor

#### Dimensions:

- See drawing
